TS/SCI

SUMMARY

Federal IT professional with 8+ years of experience driving technology adoption, organizational change, and program delivery across NASA/JPL and the DoD Defense Health Agency. MBA in Strategy and Consulting, University of Georgia Terry College of Business (September 2026). Deep practitioner knowledge of the Microsoft 365 ecosystem combined with a track record of translating complex technical environments into adoption-ready solutions for government users. Active Top Secret clearance, SCI eligible. Targeting federal consulting and organizational change management roles in health IT, cloud modernization, and federal civilian portfolios.

EDUCATION

University of Georgia, Terry College of Business - Atlanta, GA

Master of Business Administration (MBA), Strategy and Consulting - September 2026

Relevant Coursework: Organizational Leadership and Change, Corporate Strategy, Management Consulting, Data-Driven Decision Making

Seattle Pacific University - Seattle, WA

Bachelor of Science, Sociology - 2016

EXPERIENCE

ManTech International Corporation - Atlanta, GA | Aug 2023 - Present

Senior Systems Engineer

Supporting the \$450M JPL Institutional Computing Environment (ICE) program - a Caltech subcontract delivering cybersecurity, cloud, and IT infrastructure services to NASA's Jet Propulsion Laboratory.

- Led integration of PIV authentication controls, compliance automation, and platform upgrades across JPL's institutional computing environment - coordinating technical implementation with end-user adoption to deliver seamless transitions with minimal operational disruption
- Drove compliance adoption from approximately 30% to over 90% across managed Linux estate - first JPL contract group to exceed the 90% BigFix threshold - by redesigning remediation workflows, training sequences, and user communication cadences that turned a lagging program into a lab-wide benchmark
- Spearheaded process improvement initiatives across Linux managed services and Sympa platform operations, identifying inefficiencies in incident response, patch management, and compliance reporting workflows and implementing automation and standardized procedures that reduced manual effort and improved reliability
- Served as primary integration point between ManTech and JPL leadership (Contract Technical Manager and Senior Computer Systems Engineer), aligning technical execution with customer requirements and translating complex infrastructure changes into clear stakeholder communications
- Authored standardized SOPs, implementation guides, and audit-ready deliverables adopted across the ManTech ICE contract team - reducing onboarding time for new engineers and establishing repeatable processes where ad hoc approaches had previously created variability
- Integrated Microsoft Copilot and Claude into SOP authoring, change communication, and audit deliverable workflows - improving documentation quality, reducing cycle time, and enabling the team to scale knowledge transfer without proportional headcount increases
- Authored ATO response artifacts and POA&M remediation documentation in alignment with NIST 800-53 control baselines, translating complex regulatory requirements into actionable operational procedures and supporting continuous compliance across the program

American Systems - Seattle, WA | 2017 - 2023

Application Program Analyst / Customer Success

Supported the DoD Defense Health Agency (DHA) TMDS/MSAT program - enterprise healthcare applications serving DoD military health system users, under JOMIS PMO oversight.

- Led organizational integration during a complete production support leadership turnover - designed and executed a 4-month transition plan covering knowledge transfer, training sequencing, and performance ramp for 4 new hires including the incoming team manager, maintaining full operational continuity throughout
- Drove process improvement initiative that reduced recurring maintenance windows from 3-5 hours weekly to approximately 4 hours monthly - identified inefficiencies, redesigned the approach, implemented automation, and

communicated measurable gains to program leadership to secure continued investment and retain a \$42.6M long-term DHA contract footprint

- Served as primary integration point between DHA users, JOMIS PMO, internal developers, DBAs, and vendors - translating technical system changes into clear operational guidance, managing cross-functional dependencies, and ensuring all stakeholders remained aligned through application upgrades and go-live events
- Maintained SLA performance and mission continuity through a period of significant organizational change, demonstrating the ability to sustain critical healthcare IT operations while simultaneously leading a large-scale internal transition without service degradation

LEADERSHIP & ACTIVITIES

Experience Camps - National (Remote / On-Site) | 2024 - Present

Volunteer Staff

- Volunteer with national nonprofit providing free overnight grief camps to children who have experienced the loss of a parent, sibling, or primary caregiver
- Support grieving youth in building resilience and coping skills through structured programming, peer connection, and outdoor activities

SKILLS

Change Management & Adoption: Organizational change management, stakeholder analysis, communication planning, training design, adoption measurement (MBA coursework in Change Management and Organizational Leadership); Agile/Scrum, ITIL

Microsoft 365 Platform: Microsoft Exchange, Microsoft Admin Center, Microsoft Azure, Microsoft Copilot, SharePoint (working knowledge), Teams; GCC/GCC High environment familiarity

AI & Workflow Automation: Prompt engineering, LLM integration (Microsoft Copilot, Claude, ChatGPT); AI-assisted documentation, SOP authoring, and workflow optimization

Compliance & Security Frameworks: NIST 800-53, FedRAMP, CSET, BigFix; ATO support, POA&M remediation, PIV implementation

Scripting & Automation: PowerShell, Bash, Python; configuration management and compliance automation

Tools & Platforms: ServiceNow, Visio, Red Hat Enterprise Linux (RHEL), Druva, LFT

Certifications: PMP (Project Management Professional) - In Progress

Clearance: TS/SCI
